

Equipped to meet your business needs

HP iPAQ 614/614c Business Navigator

Your business has to keep running when you are on the go. This two-in-one 3G technology mobile phone with GPS navigation and personal organiser helps you run your business single handedly.

Two-in-one mobile phone with GPS navigation and personal organiser

Phone: Make voice calls and access the Internet globally via 3G and Quad-band wireless technology. IM and e-mail your associates. Use HP iPAQ Device Connect to take your notebook or PC online over the high-speed HSDPA data network^{1, 2}. Find your destination easily with Assisted GPS and built-in Google Maps for route planning. With the HP GPS Navigation Kit you can turn your iPAQ 614 into a Smart Travel Companion for Turn-by-Turn Navigation. **Organiser:** Use familiar applications to manage your day. Microsoft® Office Outlook® Mobile includes Calendar, Contacts, Email, and Tasks. **Camera:** Capture high-quality photos and video with the integrated 3 mega-pixel camera. **Media Player:** Watch videos and read ebooks with Windows Media® Player Mobile, and listen to your favourite music through the speaker or with an optional Bluetooth® stereo headset.

Designed for single-handed use

Scroll through your e-mail, zoom in and out of maps, and look through your files with the Smart Touch Wheel and Thumb Scroll Wheel. View your work comfortably with the big, bright touch screen display. Easily switch between portrait and landscape display modes.

A powerful mobile solution goes beyond the device

Whether you're an IT manager or a mobile professional, you work in a complex environment. Your world – spanning countries and continents, an array of wireless technologies and networks, and powerful applications and communication tools – has a singular purpose: to drive business results. HP, a global leader in technology, services, and support, understands that mission. Mobile Devices are just a small piece of the challenging puzzle that is your enterprise mobility program. Your business runs on key applications. Your proprietary data is irreplaceable and must be protected. The effort you put into testing, approval, deployment, and remote management of your IT is enormous. HP can help you deploy and support your mobility strategy – from device-level support to enterprise support solutions, across geographies and vendors. Put our mobile devices and global support to work for you.

Think mobile. Think global. Think HP.

¹ A standard GSM/GPRS/EDGE/UMTS/HSDPA infrastructure, Wi-Fi or other Bluetooth-enabled devices, separately purchased equipment, and a service contract with a wireless airtime provider may be required for applicable wireless communication. Wireless Internet access requires separately purchased Internet service contract. Check with service provider for availability and coverage in your area. Not all web content available. Wireless transmission speeds may vary based upon network capabilities and other conditions. Establishment and continuation of a wireless connection depends on network availability, provider support and signal strength.

² EDGE (Enhanced Data for Global Evolution) is a global standard for wireless wide-area data communication being rapidly deployed by GSM carriers worldwide. Actual download speeds may vary. Coverage is subject to transmission limitations and terrain, system, capacity and other limitations. Not all features and service options are available in all areas.

HP iPAQ 614/614c Business Navigator
